Review

Energy and angular distributions of sputtered particles
G. Betz (Wien, Austria) and K. Wien (Darmstadt, Germany) 1

Self imaging of surface ionization ion sources — where do the ions come from?
J.E. Delmore, A.D. Appelhans and J.E. Olson (Idaho Falls, ID, USA) 111

Thermoemission of Ce^+ ions and its fluctuations
L. Gładyszewski (Lublin, Poland) 123

Thin layer chromatography–mass spectrometry using infrared laser desorption
T. Fanibanda, J. Milnes and J. Gormally (Salford, UK) 127

On the reactions of perfluoroisobutene with some anions in the gas phase: studies in an ion mobility spectrometer
A.J. Bell, C.J. Hayhurst (Salisbury, UK), C.A. Mayhew (Birmingham, UK) and P. Watts (Salisbury, UK) 133

Quantitative assessment of multiple excitation events in Fourier transform ion cyclotron resonance mass spectrometry
D.E. Riegner, F. Hadjarab and D.A. Laude, Jr. (Austin, TX, USA) 149

Benzyne-related mechanisms in the gas phase ion/molecule reactions of haloarenes
H.V. Linnert and J.M. Riveros (São Paulo, Brazil) 163

Short communication

Surface-induced dissociation and ion–surface reactions at insulating surfaces
T.E. Kane and V.H. Wysocki (Richmond, VA, USA) 177
